

## SOFTWARE REQUIREMENT SPECIFICATION FOR PRODUCT REVIEW AND TRACKING SYSTEM.

NAME	VARSHINI S
ROLL NUMBER	7376221SE155
SEAT NUMBER	95
PROJECT ID	15
PROBLEM STATEMENT	PRODUCT REVIEW AND TRACKING SYSTEM.

### 1. Introduction

#### 1.1. Purpose:

The Product Review and Tracking System is a platform designed to facilitate manage the entire product development process, ensuring efficiency, accountability, and quality. This document provides a detailed description of Product Review and Tracking System, including its purpose, features, interfaces, operations, constraints, and reactions to external stimuli.

### 2. System Overview:

#### 2.1. User Roles:

Admin: These are the student managers. They can view and update details for their assigned students, including personal information, grades, attendance, discipline records, and more.

Student: Students can only view their own information on the dashboard. This includes their academic history (semester by semester), grades, attendance, and other details.

Parent: Parents can see recent activity updates about their child. They can click for further details if they want to see more.

## Stack - Spring Boot

Front End	React.js
Back End	Spring Boot
Database	MySQL
API	Open API / REST Ful API

### Pre-Requirements:

HTML, CSS, Java Script, Node js, Open API.

## 2.2. Features:

### Start

-> Login (Admin, Student, Parent)

Valid Login? (Valid / Invalid)

Valid -> User Dashboard (Based on Role)

Invalid -> Error Message

### Admin

Dashboard

-> Manage Admins

- View Existing Admins
- Add New Admin (Details)
- Edit/Delete Existing
- approve or reject applications (with remarks),
- manage appointments,
- schedule meetings.

-> Student Details Management

- Select Student
- View & Update Details:
  1. Personal
  2. Grades (Semester-wise)
  3. Attendance (Semester-wise)

4. Disciplinary Records

5. Additional Information

### **Student Dashboard**

-> View Academic History

➤ Semester-by-Semester

➤ Grades

➤ Attendance

➤ Other Relevant Details

### **Parent Dashboard**

-> View Recent Student Activities

➤ Summary of Updates (Grades, Attendance etc.)

➤ Click for More Details (Optional)

## **3.1 Functional Requirements:**

- User Management:

- Students can login.
- Admins have access control with an analytical dashboard and dedicated features

- Product Application:

- Students can submit applications with appropriate details
- Application form contains:
  - ❖ Title of Product
  - ❖ Category of the product (hardware/software)
  - ❖ Number of students involved with domain.
  - ❖ Problem statement document.

- Expert Committee Member Application:

- 1.Name, Roll no., department,
2. Project Category,
- 3.Title, Domain,
4. Faculty Name with id, Number of faculty,
5. Provisional Attachment and
6. Reward Points with Domain wise.

- Application Status:

- Students can view the status of their application

- If the application is rejected then the remarks is shown.
- Appointment Scheduling (After Approval from Export Committee):
  - Students can request appointments and book their shots.
- Analytics Dashboard:
  - Admin can view the number of applications by its category
  - Number of appointments is requested based on the category

### 3.2 Non-Functional Requirements:

Performance: Response within 2 seconds, handle 100 concurrent users.

Security: Data encryption, secure authentication.

Usability: Intuitive interface, clear error messages.

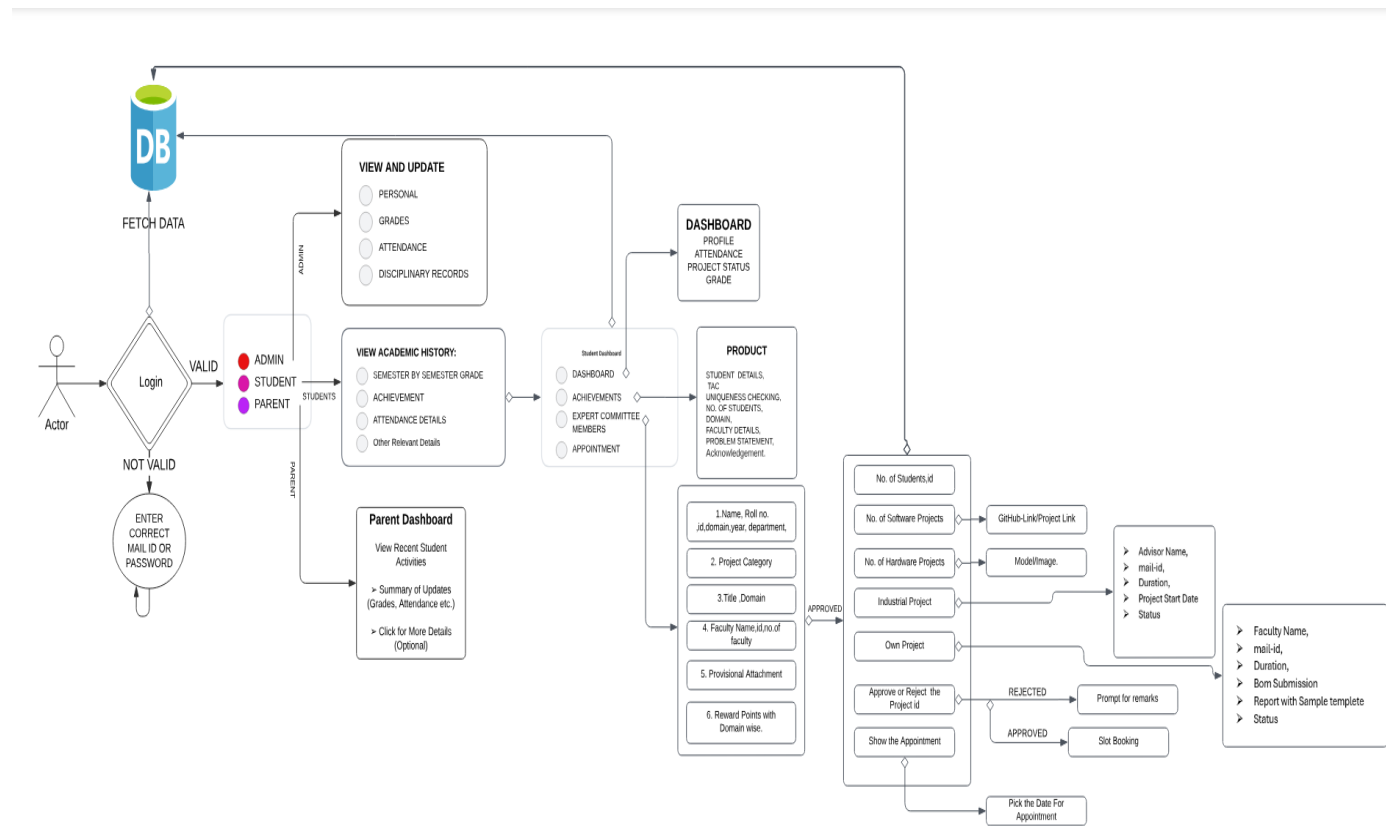

Reliability: 24/7 availability, backup and recovery.

Scalability: Accommodate increasing users and data volume.

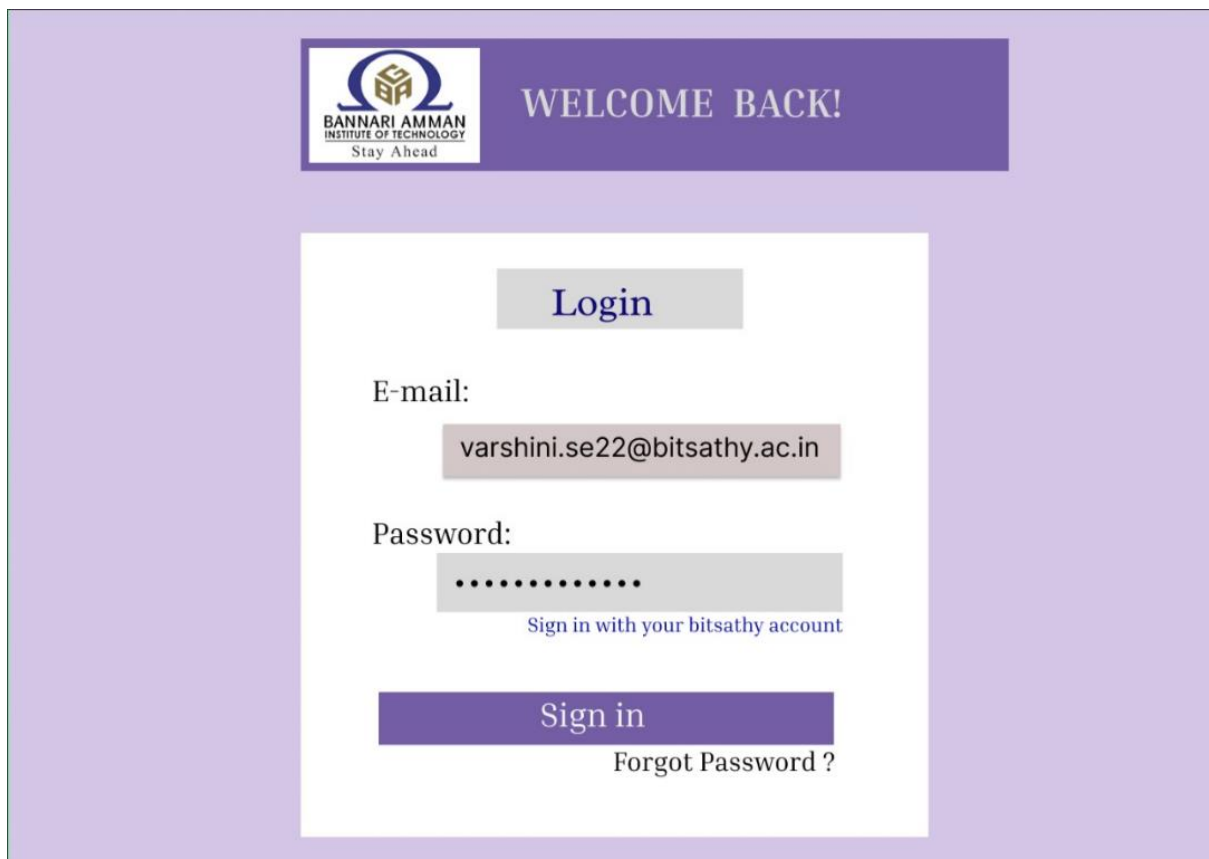

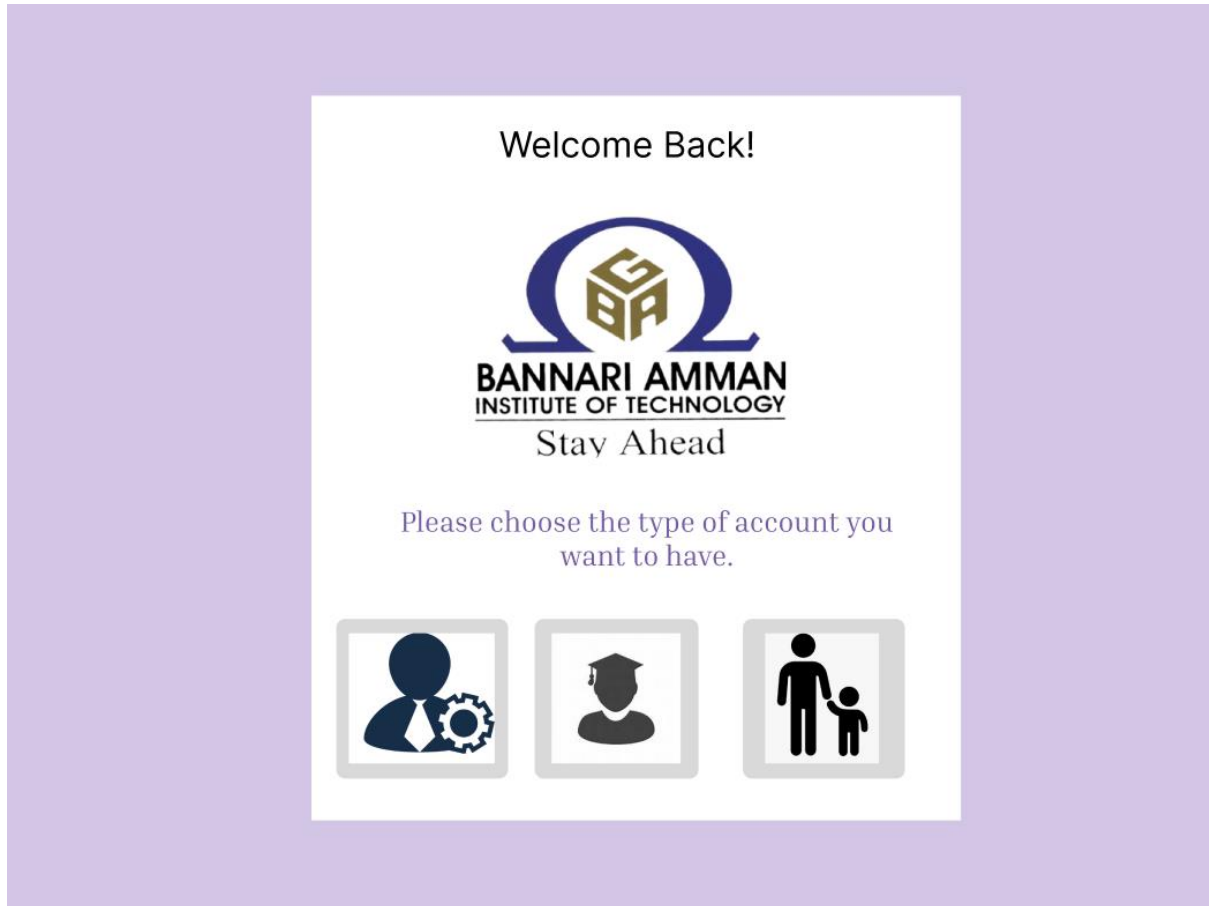

Backend:

Student entity:	Name, email, password, Roll no. (String)
Product Application:	Roll no, Details, category, title, number Of Students(Number), additional Students, pdf Path, status.
Export Committee Member Application:	Name, Roll no., department, Project Category, Title, Domain, Faculty Name, Number of faculty(Number), Provisional Attachment and Reward Points with Domain wise.
Appointment Entity:	Roll no, Product appointment Details
